The cut above illustrates a Grain Drill, which we think will meet the wants of the grain producers of the South and West, and prove to be what they have so long been waiting for, viz: A strong, simple, effective drill, that does not require skilled labor to manage, or a machinest to be on hand with his

and putting in new ones, no stopping to clean out trash, weeds, stalks, sods clumps, stones and roots. The steel springs ride over any obstruction the edge of the shoe can not divide, and the shoes, instead of gathering like a take all the trash before them, leave it behind and clear themselves,

depth of the furrows, depositing the grain at the proper germinating point.

We are happy to announce to our patrons that we have added to our Spring Drag Drills a Fertilizer Attachment for sociang bone dust, phosphates guand and plaster in the furrows with wheat. We have studied to make this improvement so as to present the same simplicity of construction and case of management already found in our Grain Grill; not a cog-wheel about it; the motion is very simple, and the flow of the Fertilizer under perfect control of the driver without moving from his sent.

We are also agents for this old and well established drill. Over 500 are in use in this section. We refer you to them with pride, knowing that they will give you entire satisfaction,

WILLOUGHBY

We are also selling the Willoughby Grain and Fertilizer Drill. In many sections of the country, where this drill has been used longest, none other can be sold. It is a good drill and deserves a liberal patronage.
